Records data onto removable SD Cards

Reads pH, ORP, and temperature. Records data onto standard SD memory cards (like a digital camera). When full, simply exchange SD cards for unlimited data storage. The removable SD card is easy to transport and insert into a computer's memory card slot or SD card adaptor. Uploads pre-formatted data to Excel, without the need for additional software and cables. Additional SD cards are readily available in a variety of memory sizes. Can also stream data directly to a computer using the optional software and cables. Each data set includes pH, temperature, time and date. Features ATC (automatic temperature compensation) or manual temperature adjustment, automatic buffer recognition, min/max, auto power off, low battery indicator and hold function. This well made unit is extremely accurate with fast response times, and includes a fold-out easel back and a large easy-to-read backlit LCD. Comes ready to use in a soft carrying case with 6 AA batteries, instruction manual and a 2GB SD card. ATC temperature probe available as optional accessory. Will accept any pH or ORP probe with a BNC connector. Dim: 7" x 2¾" x 2" (177 x 68 x 45mm). Weight: 1lb (489g).

U.S. Patent Pending
No. 20100145658

No.	Description	Each
850060	pH SD Card Logger	\$221.00
840016	General Purpose pH Probe	\$72.50
840038	ATC Temp Probe	\$46.25
840049	Spear Tip pH Probe	\$83.00
840057	RS232 Computer Cable	\$24.25
840059	2GB SD Card	\$10.50
840090	Water Resistant Instrument Pouch	\$10.50
840093	Field Tripod	\$30.50
840094	USB Computer Cable	\$23.25
840097	AC Adaptor	\$20.00
850080	Software	\$55.75
850088	ORP Probe	\$137.75
860008	pH 4, 3 Bottles, 40 ml Each	\$12.75
860009	pH 7, 3 Bottles, 40 ml Each	\$12.75
860010	pH 10, 3 Bottles, 40 ml Each	\$12.75
860011	pH 11, 3 Bottles, 40 ml Each	\$12.75

	Range	Res.	Accuracy
pH	0 ~ 14 pH	0.01	± (0.02 pH+2d) rdg
mV	-1999 ~ 1999 mV	1	± (0.5%+2d) rdg
ORP	-0 ~ 1999 ORP

pH SD Card Logger Kit

Everything necessary for immediate field use: pH SD Card logger 850060, sealed epoxy body reference combination electrode with a BNC connector and a 2½' cable, ATC temperature probe, pH buffers 4, 7, 10 and deionized water, batteries and instructions. All components are contained in a slim but protective hard-shell, foam-lined case. Kit dim: 11" x 7½" x 2½" (280 x 190 x 63mm).

No.	Description	Each
850061	pH SD Card Logger Kit	\$289.00
